

CENTO-PUNCH[®] AUTOMATIC

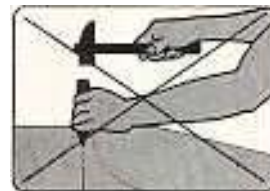

Denting force adjustable

Model : ACP

The new pen type, sturdy and handy, automatic **CentoPunch** for definite grip and easy handling.

No hammer required, just mark and press to get a perfect dent with every hit.

New 'bse' automatic **CentoPunch** is robustly constructed with the indenter made of hardened and tempered steel properly ground for toughness and long life without getting rusted. The body is properly treated to prevent rusting and is properly knurled for comfortable and positive gripping.

No hammer is required for operating the automatic **CentoPunch**. All one has to do is, to mark the point where the dent is required, hold the **CentoPunch** in vertical position over this mark and press the body down till the built-in mechanism releases the hammer to give perfect centre mark with every shot.

The force of the impact can be regulated infinitely by turning the top knurled cap. Turn the cap down to increase the impact for hard metals and turn the cap up for decreasing the impact for softer metals. Once the cap is adjusted, **CentoPunch** will give the same dent with every shot.

All the working parts are made of special steel properly heat treated to give longer life. The tool steel point (indenter) is hardened and tempered for perfect dents and longer life and can be removed for regrinding or replacement if required.
