

## TESTER STAND

MODEL : STD A / D

MODEL : STD - A

MODEL : STD - D

**APPLICATIONS** For obtaining most uniform and reliable results from the use of hardness testers. It is a time-saving stand particularly for mass checking of components. It is for use with tester models : SHR-A, SHR-A-GOLD & FMR.

### APPLICATIONS

For obtaining most uniform and reliable results from the use of hardness testers. It is a time saving device particularly when mass testing of components is a must. It is recommended for use with tester models : SHR - D, SHR - D - GOLD

**SPECIAL FEATURES** It consists of a spring loaded table which can be raised on to the two holding pins. The tester can be just slipped on to the two holding pins. When testing, the movement is under constant pressure and is absolutely vertical, thereby eliminating any possibility due to human error on various accounts.

### SPECIAL FEATURES

These are the same as above except it has a main spring to suit load deflection characteristics of these testers.

### RANGE

0 to 100 as per testers.

### RANGE

0 TO 100 as per testers.

### TECHNICAL DATA:

Admit : 45 mm  
 Packing : Deluxe wooden box  
 Dimensions : 275 x 230 x 100 mm  
 Weight : 3.55 kg
